REST API DOCUMENTATION
CAREERTRACK: FULL-STACK JOB PORTAL & APPLICANT TRACKING SYSTEM
==

Prepared By: Aditi Rajpoot (GitHub: iaditi97)
Program: Full Stack Web Development / MERN Stack Training Program
Live Frontend URL: https://career-track-eosin.vercel.app
Base Production API URL: https://careertrack-isqj.onrender.com
Local Development URL: http://localhost:5000
Content-Type: application/json (multipart/form-data for resume uploads)

---
1. AUTHENTICATION, RATE LIMITING & ARCHITECTURE

- Architecture: MVC Pattern (Routes -> Controllers -> Mongoose Models)
- Authorization: Protected employer endpoints require a valid JSON Web Token
  (JWT) verified by Auth.js middleware in the HTTP header:
  Authorization: Bearer <your_jwt_token>
- Rate Limiting: All /api/* routes are protected by express-rate-limit
  (maximum 100 requests per 15-minute window per client IP).

---
2. AUTHENTICATION ENDPOINTS (/api/auth — AuthRoutes.js)

2.1 Register New Employer / Admin
- Method & Endpoint: POST /api/auth/register
- Access: Public
- Request Body (JSON):
  {
    "email": "employer@company.com",
    "password": "SecurePassword123"
  }
- Success Response (201 Created):
  {
    "token": "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9...",
    "email": "employer@company.com"
  }
- Error Responses:
  - 400 Bad Request: Account already exists or missing required fields.

2.2 Employer / Admin Login
- Method & Endpoint: POST /api/auth/login
- Access: Public
- Request Body (JSON):
```
{
  "email": "employer@company.com",
  "password": "SecurePassword123"
}
```
- Success Response (200 OK):
```
{
  "token": "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9...",
  "email": "employer@company.com"
}
```
- Error Responses:
  - 401 Unauthorized: Invalid email or password.

---
3. JOB LISTING ENDPOINTS (/api/jobs — JobRoutes.js & JobController.js)

3.1 Get All Job Postings (with Search & Filter)
- Method & Endpoint: GET /api/jobs
- Access: Public
- Optional Query Parameters:
  - ?search=developer (filters by job title, company, or location)
  - ?type=Full-time (filters by Full-time, Part-time, Internship, Contract)
- Success Response (200 OK):
```
[
  {
    "_id": "6735a1b2c3d4e5f6a7b8c9d0",
    "title": "Full Stack MERN Developer",
    "company": "TechNova Solutions",
    "location": "Remote / Bangalore",
    "salary": "8 - 12 LPA",
    "type": "Full-time",
    "description": "Build and scale full-stack web applications...",
    "requirements": "React, Node.js, Express, MongoDB",
    "status": "Active",
    "createdAt": "2026-11-10T10:00:00.000Z"
  }
]
```

3.2 Get Single Job Details by ID
- Method & Endpoint: GET /api/jobs/:id

- Access: Public
- Success Response (200 OK): Returns single Job JSON object.
- Error Responses:
  - 404 Not Found: Job posting not found.

3.3 Create a New Job Posting
- Method & Endpoint: POST /api/jobs
- Access: Private (Requires Bearer JWT Token)
- Request Body (JSON):
```
{
  "title": "Frontend React Engineer",
  "company": "CloudScale Inc",
  "location": "Indore, India",
  "salary": "6 - 9 LPA",
  "type": "Full-time",
  "description": "Develop responsive user interfaces...",
  "requirements": "React, Tailwind CSS, REST APIs"
}
```
- Success Response (201 Created): Returns newly created Job object.

3.4 Update Job Details or Toggle Status (Active / Closed)
- Method & Endpoint: PUT /api/jobs/:id
- Access: Private (Requires Bearer JWT Token)
- Request Body (JSON):
```
{
  "status": "Closed"
}
```
- Success Response (200 OK): Returns updated Job object.

3.5 Delete a Job Posting
- Method & Endpoint: DELETE /api/jobs/:id
- Access: Private (Requires Bearer JWT Token)
- Success Response (200 OK):
```
{
  "message": "Job deleted successfully"
}
```

---
4. APPLICATION & ATS ENDPOINTS (/api/applications — ApplicationRoutes.js)

4.1 Submit Job Application with Resume Upload
- Method & Endpoint: POST /api/applications/submit
- Access: Public (No candidate login required; handled by Upload.js & ApplicationController.js)

- Request Body (multipart/form-data):
  - jobId: String (MongoDB ObjectId of target job)
  - name: String (Candidate full name)
  - email: String (Candidate email address)
  - phone: String (Contact number)
  - qualifications: String (Educational background)
  - experience: String (Years of experience or summary)
  - resume: File (.pdf or .docx only, maximum size 5MB)
- Success Response (201 Created):
  ```
  {
    "message": "Application submitted successfully!",
    "application": { ... }
  }
  ```
- Error Responses:
  - 400 Bad Request: Duplicate application for this job, closed job, or invalid file format/size (>5MB).

4.2 Get All Applications for a Specific Job
- Method & Endpoint: GET /api/applications/job/:jobId
- Access: Private (Requires Bearer JWT Token)
- Success Response (200 OK): Returns array of candidate application objects including resume file path, pipeline status, and internal notes.

4.3 Update Candidate Pipeline Status & Evaluation Notes
- Method & Endpoint: PUT /api/applications/:id/status
- Access: Private (Requires Bearer JWT Token)
- Request Body (JSON):
  ```
  {
    "status": "Shortlisted",
    "notes": "Strong MERN portfolio; schedule technical round."
  }
  ```
- Allowed Status Values: Submitted, Under Review, Shortlisted, Selected, Rejected
- Success Response (200 OK): Returns updated Application object.
